

BLOCKBUSTERS: EVALUATING MOVIE GENRES, DIRECTORS AND MARKETS

Data-driven recommendations based on industry analysis

Presented by: Data Science Group – **CineFlix Productions**

Date: 02/05/2025

OUR TEAM

The Team Composition for the Data Science Group includes:

- ❖ James Wachira – **Project Lead**
- ❖ Tim Musungu
- ❖ Vivian Kwamboka
- ❖ Calvin Mutua
- ❖ Hashim Ibrahim

OUR PROBLEM STATEMENT

Overview:

- ❖ We are a new film studio that want to start making original content in the form of film (movies, documentaries etc).

Challenge:

- ❖ We currently have a gap in our understanding of the current movie landscape from the demand side.
- ❖ We need to carry out an analysis to answer the simple questions: what kind of movies are most people watching? What movies should we invest in?

Proposed Solution:

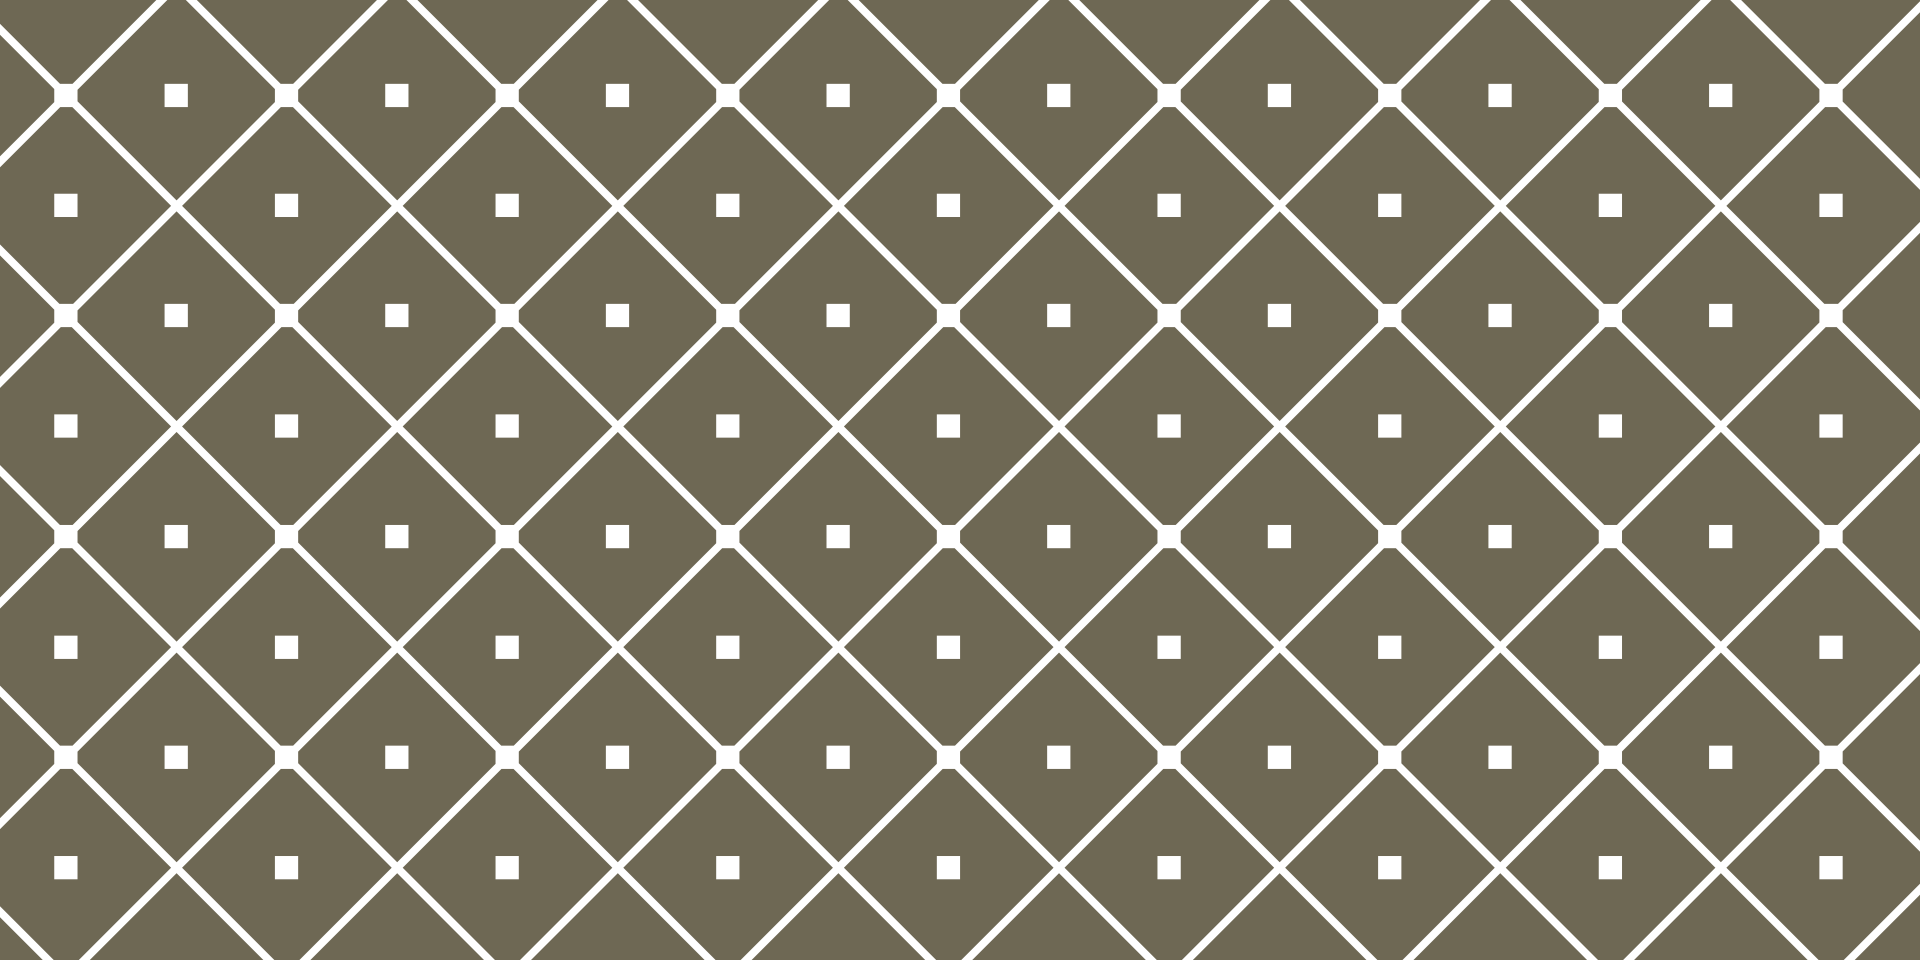

- ❖ To answer this question, we will carry out a **comprehensive market analysis**, using data sourced from popular movie rating databases as well as revenue data describing the financial performance of movies.
- ❖ This analysis will not only guide our content generation strategy but also our business strategy as to which market to focus on.

OUR BUSINESS OBJECTIVES

- To determine the most popular **movie genres** based on *production frequency* ('Most Popular') and *movie revenues* ('Highest Grossing')
- To determine the best **movie directors** based on number of *movies produced* ('Most Experienced'), *movie ratings* ('Highest Rated') and *movie revenues* ('Highest Grossing')
- To determine the most profitable **movie markets** based on *movie revenues* ('Highest Grossing') for both Domestic and Worldwide audiences
- Translate findings into **actionable insights**.

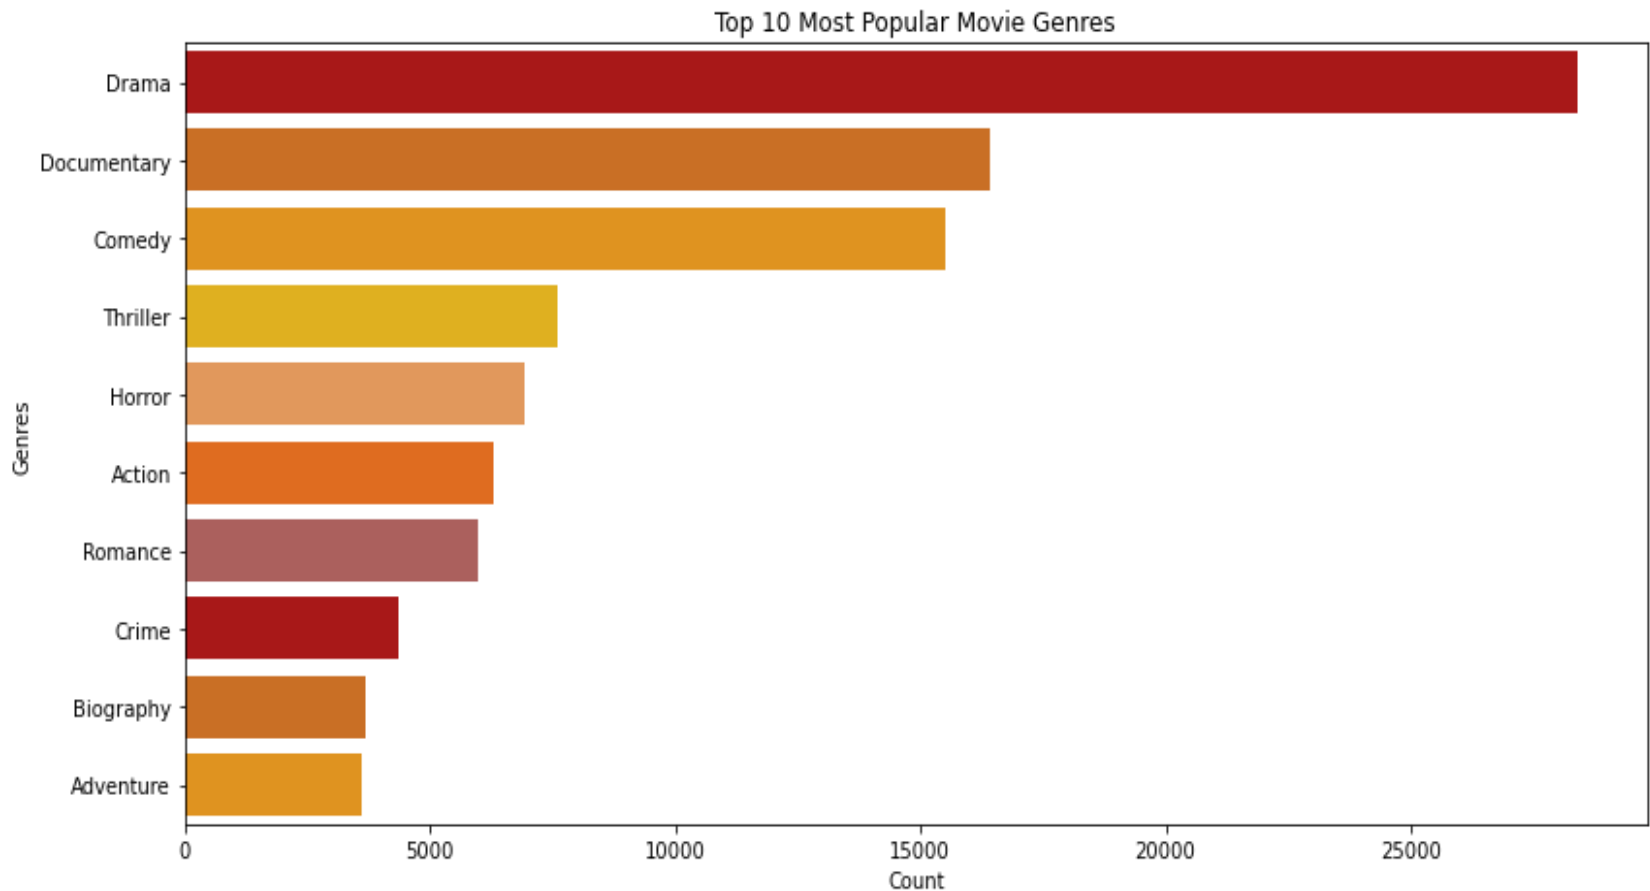

DATA SOURCES

- Box Office Mojo
- IMDb
- Rotten Tomatoes
- The Movie Database (TMDb)
- The Numbers database

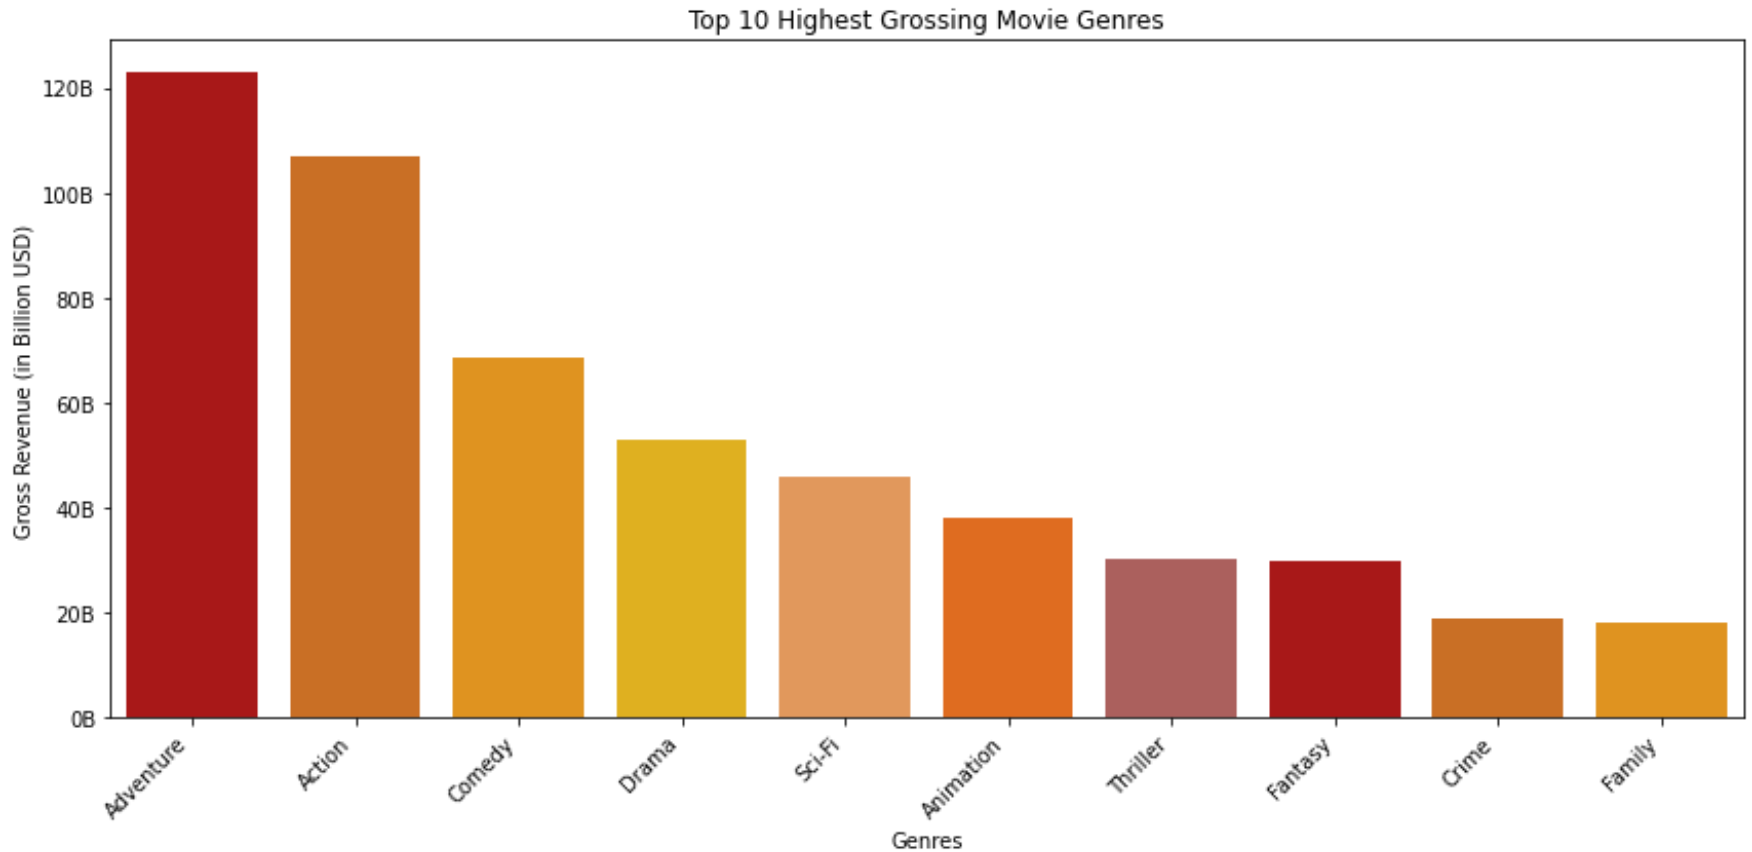

**MOVIE GENRES: DRAMA OR
ACTION?**

MOST POPULAR MOVIE GENRES

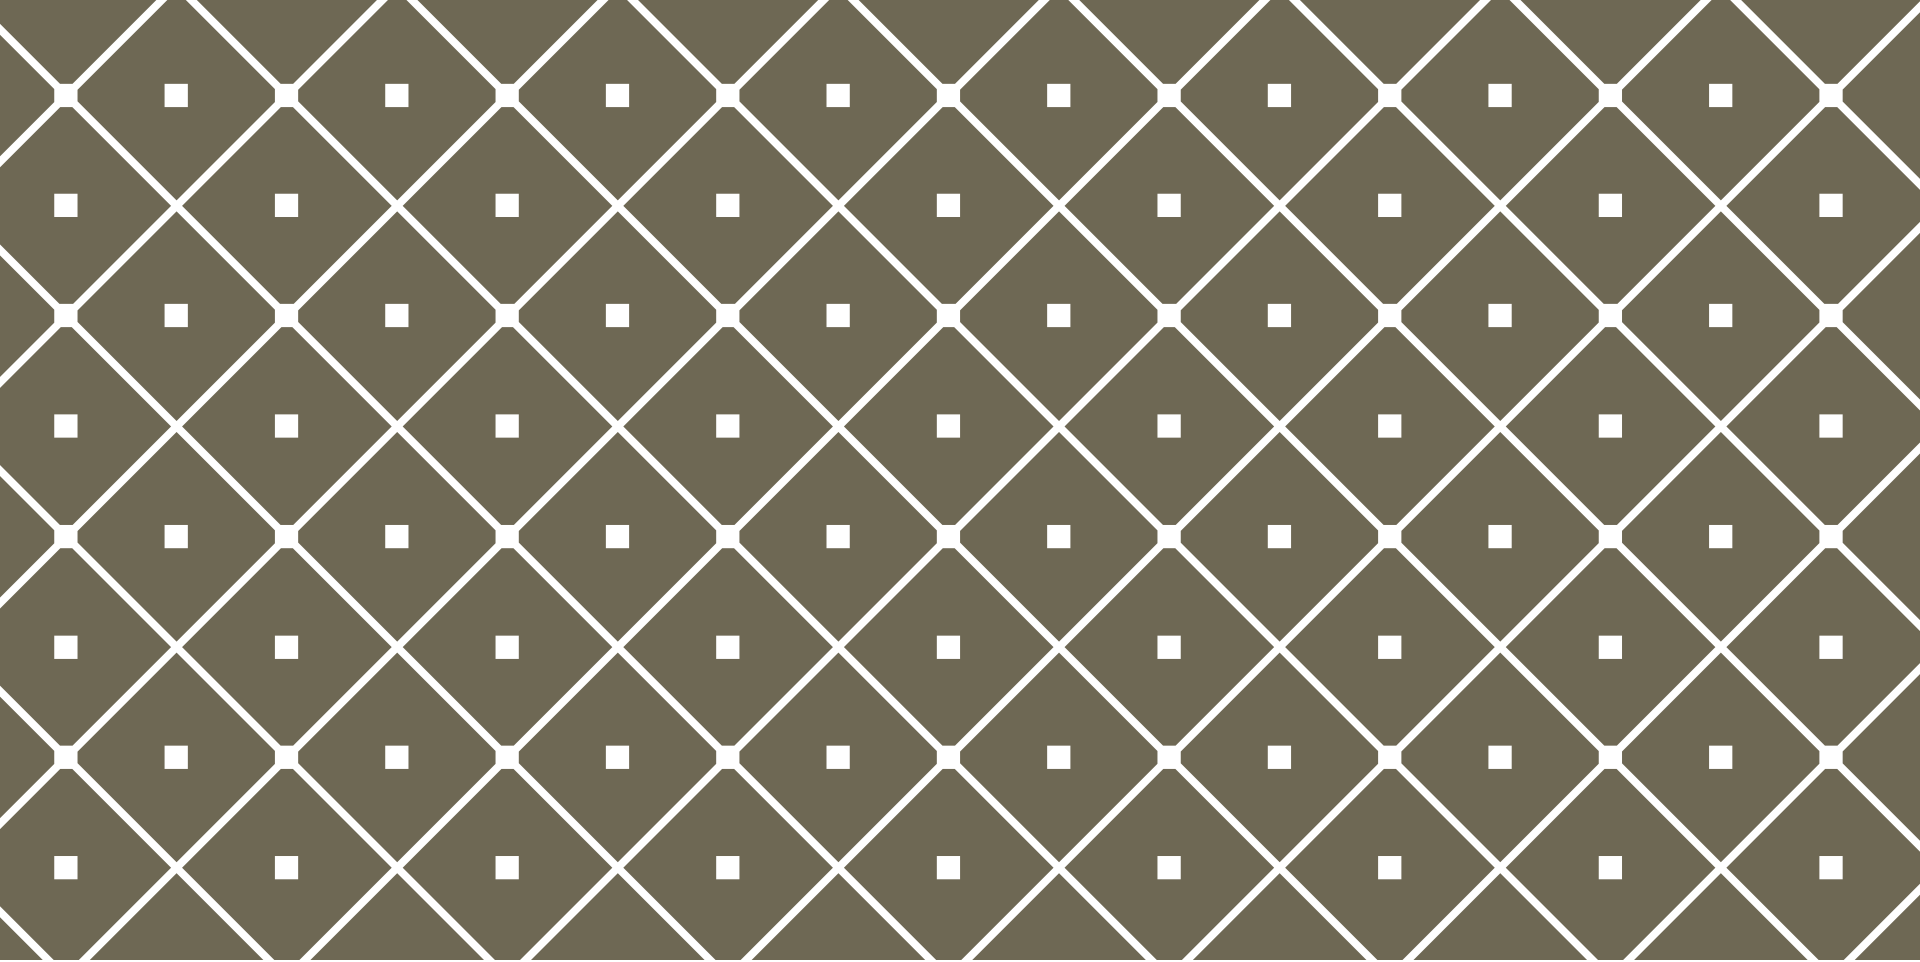

HIGHEST GROSSING MOVIE GENRES

TOP 10 MOVIE GENRES

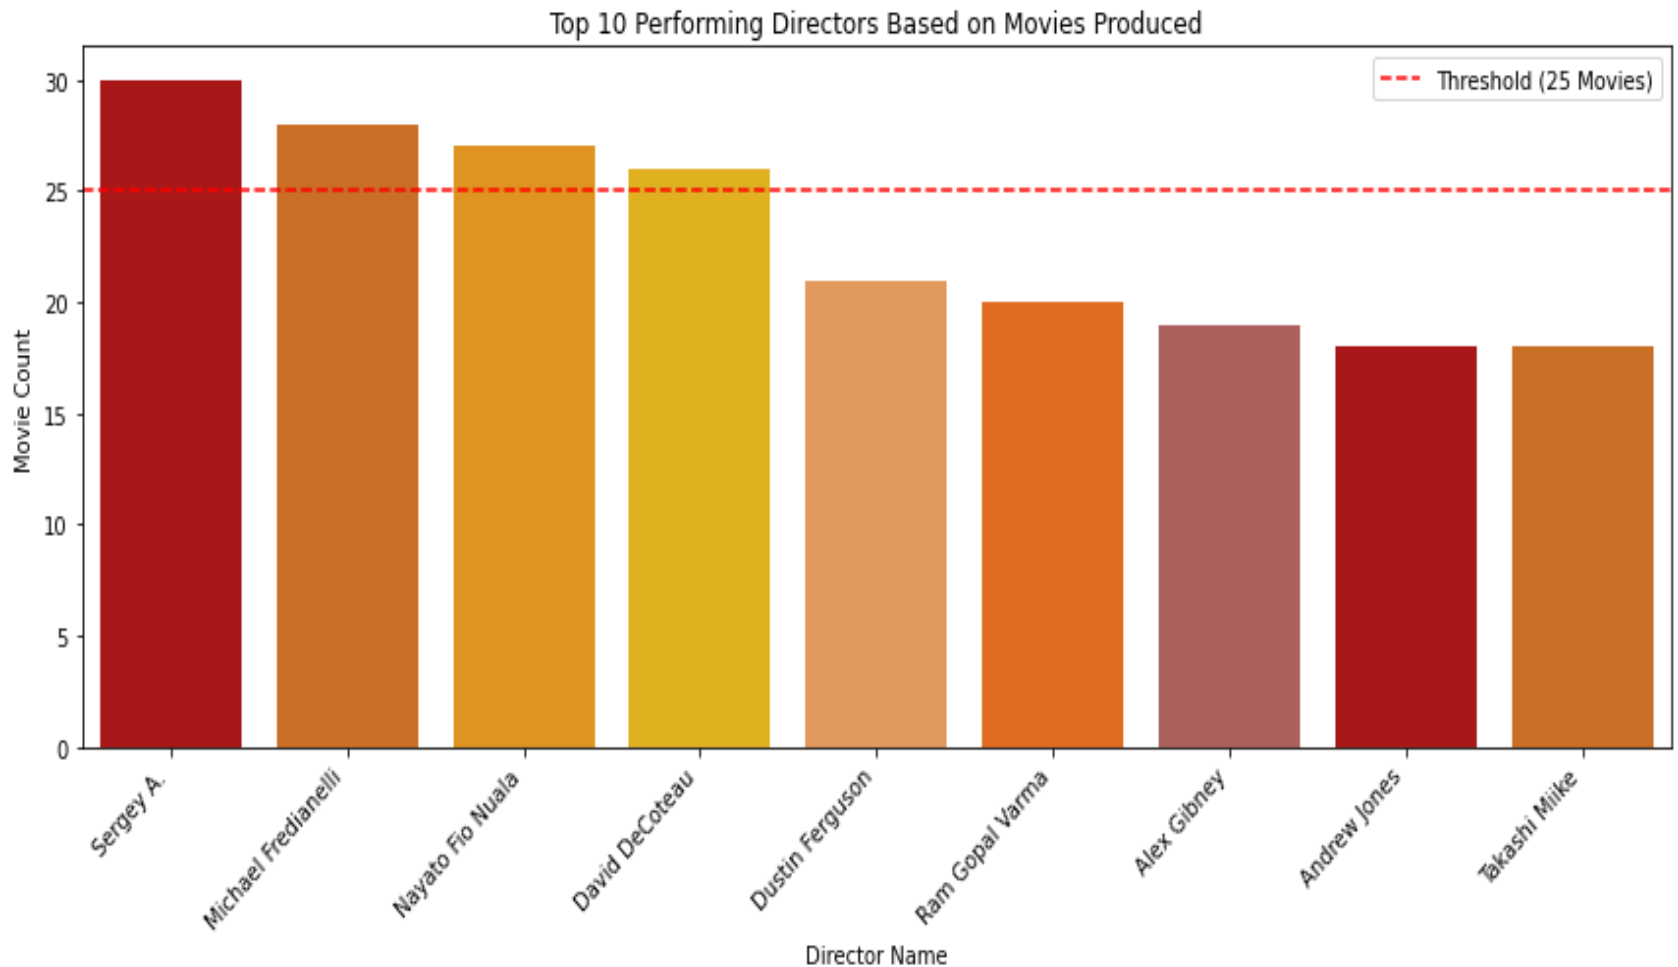

- Drama is by far the most popular movie genre with Documentary and Comedy films lagging not far behind
- Films focusing on Crime, Biographies or Adventure come at the tail end of the list
- Adventure films jump to the top spot with over **USD 120B** grossed to date
- Action (**USD 107B**) and Comedy (**USD 69B**) films follow closely behind

✓ **Insight:** Drama films dominate the list of popular films but Action-Adventure films are the true kings of profit

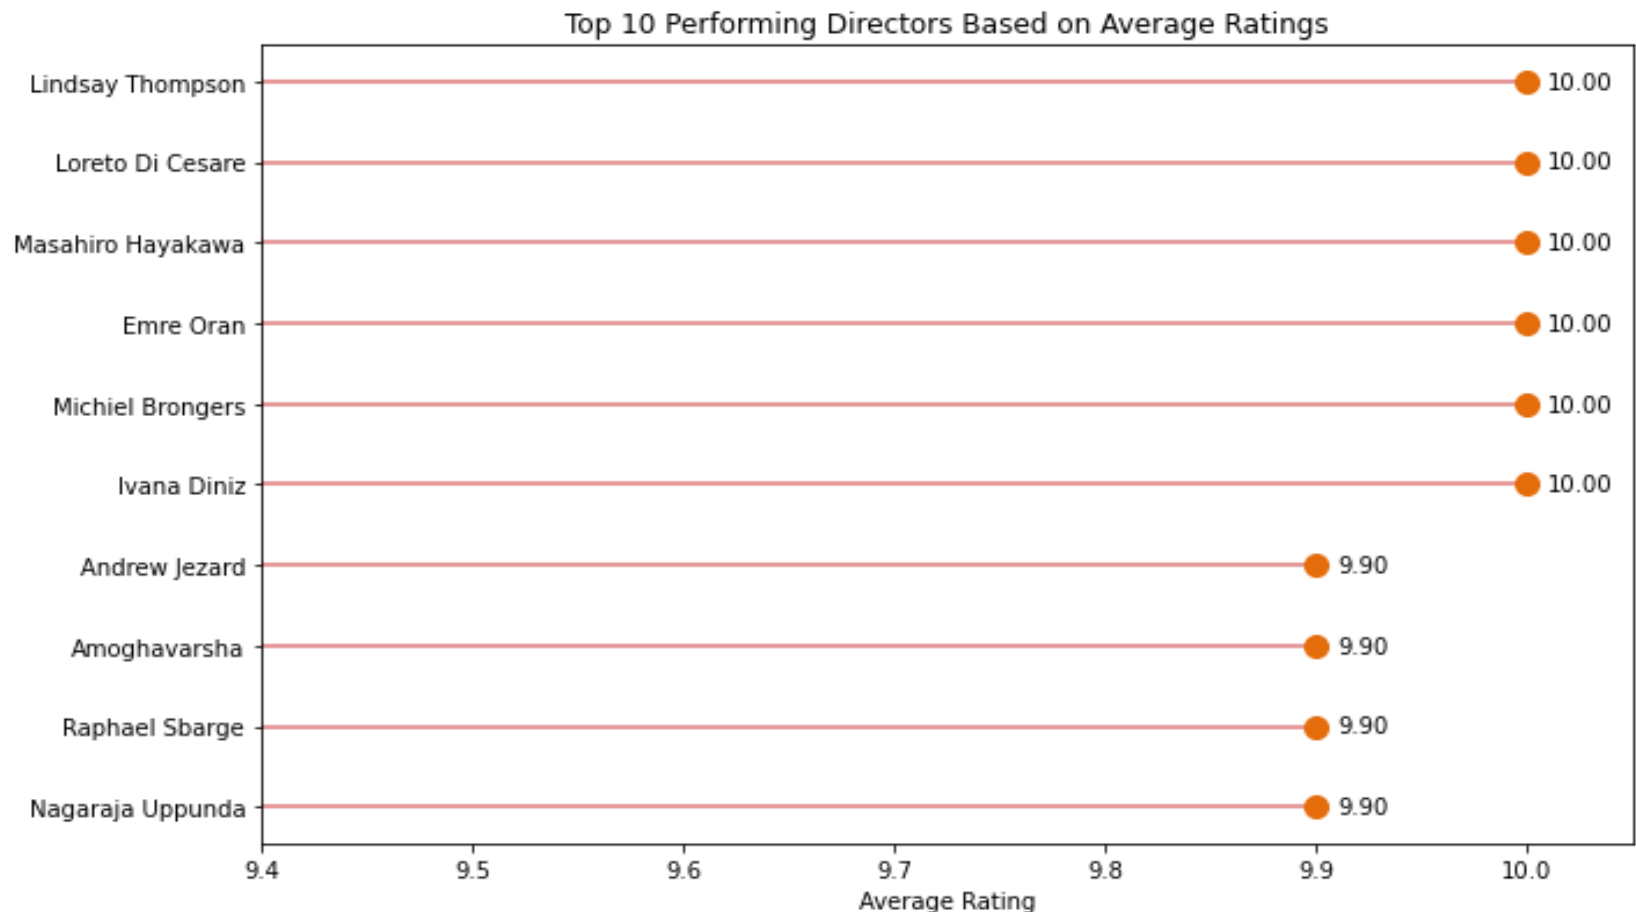

MOVIE DIRECTORS: WHO IS THE BIG DOG?

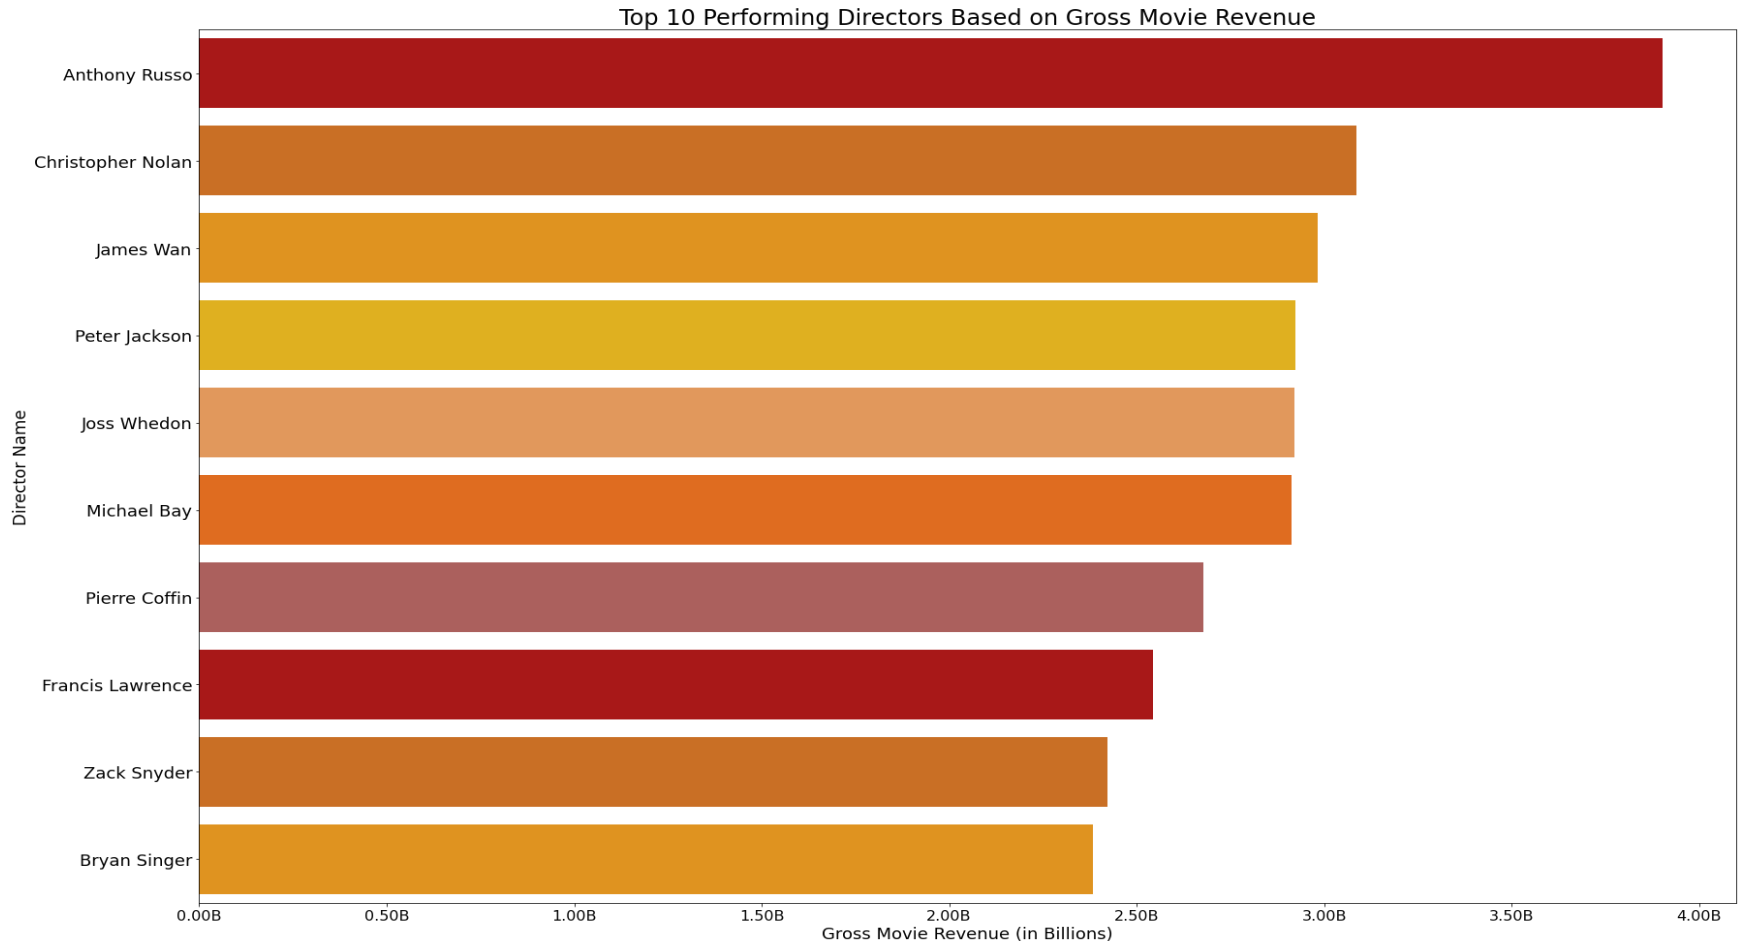

MOST EXPERIENCED MOVIE DIRECTORS

HIGHEST RATED MOVIE DIRECTORS

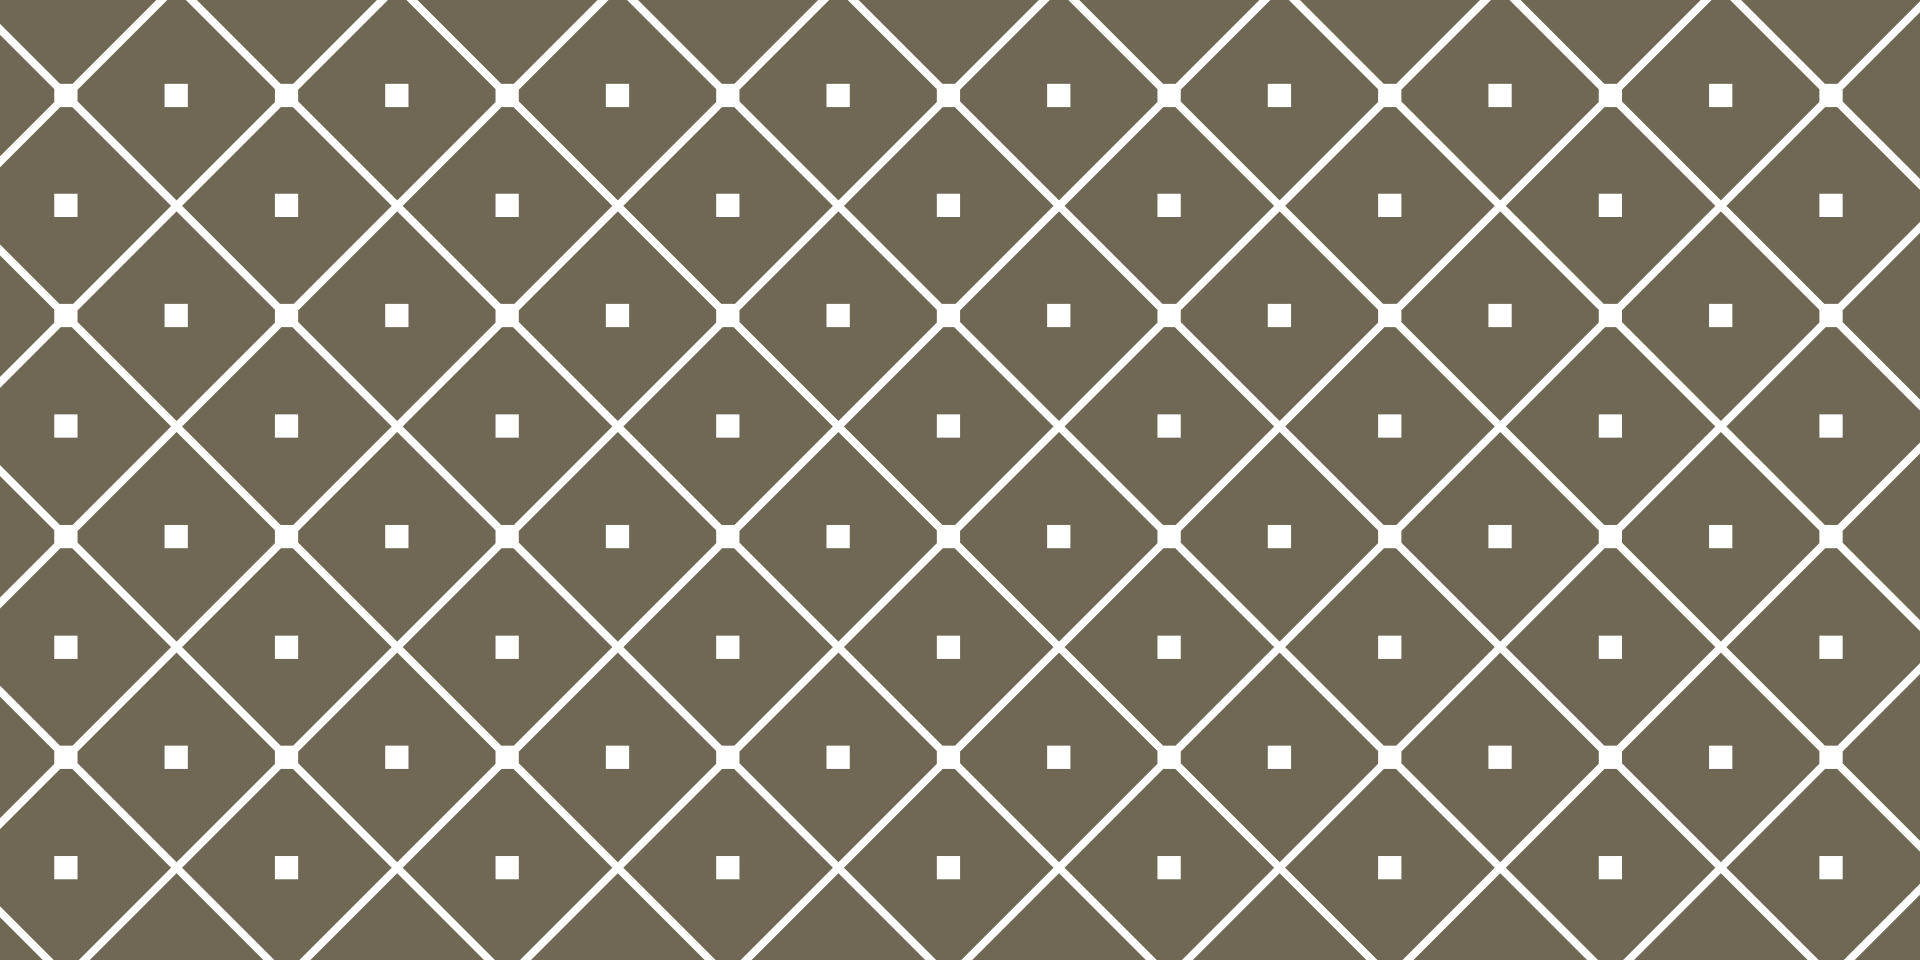

HIGHEST GROSSING MOVIE DIRECTORS

TOP 10 MOVIE DIRECTORS

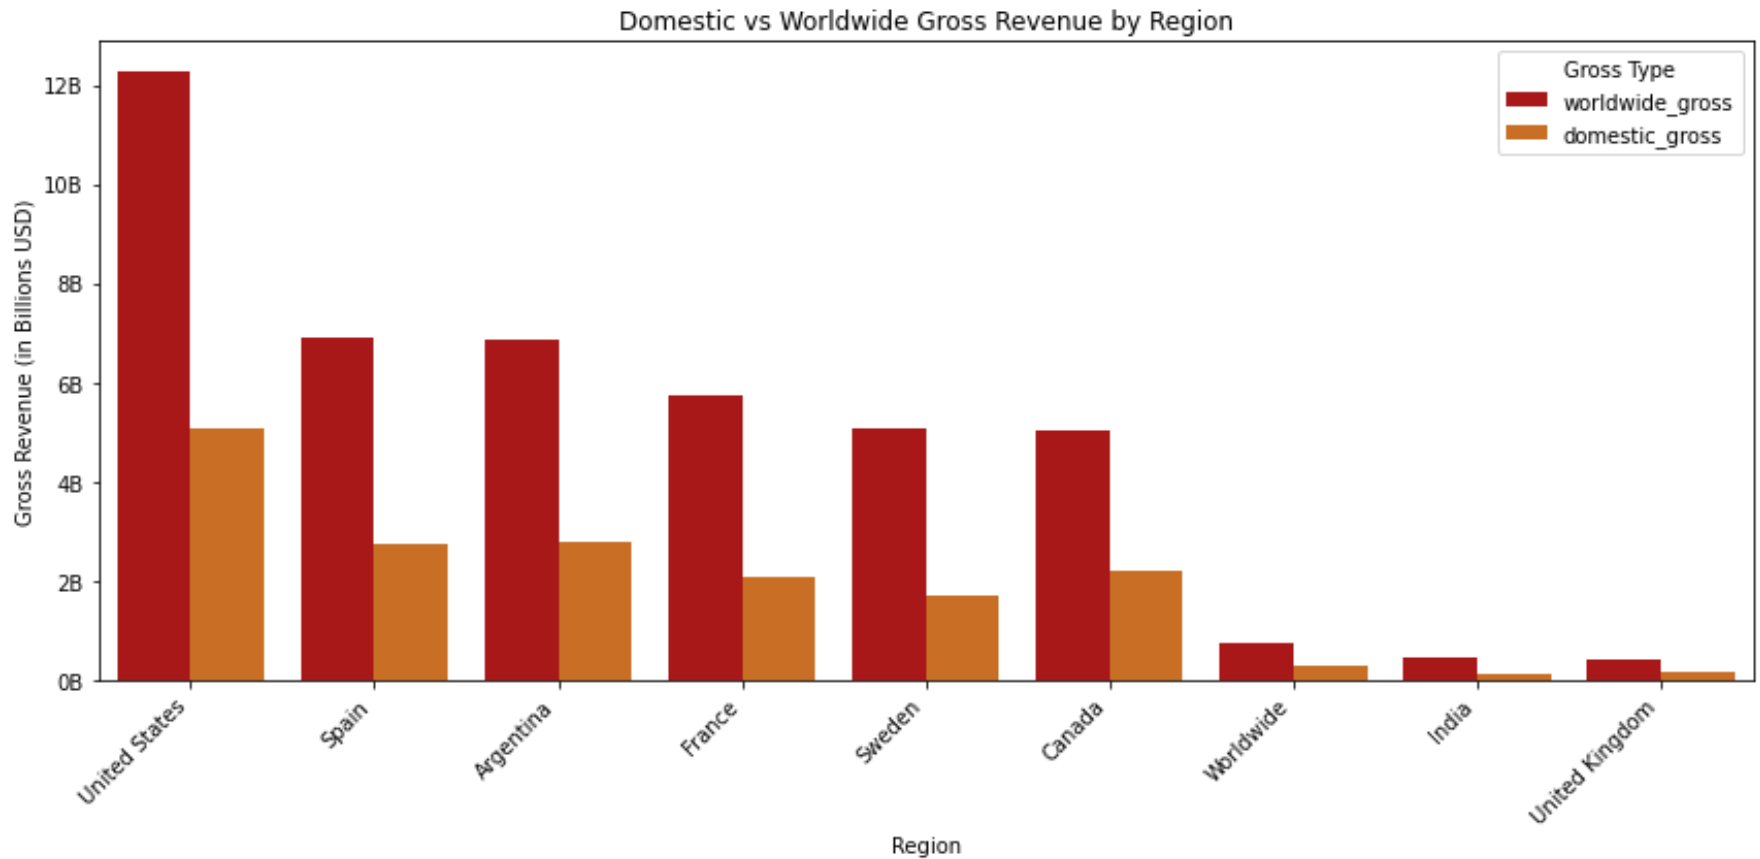

- Sergey A., Michael Fredianelli, Nayato Fio Nuala and David DeCoteau are the top 3 most productive directors, all producing over 25 films
- Lindsay Thompson, Loreta Di Cesare, Masahiro Hayakawa lead the list of highest rated movie directors
- Anthony Russo, Christopher Nolan and James Wan make up the titanic trio of movie directors whose movies make the most money (profitability)

✓ **Insight:** There is **zero overlap** between the 3 lists of top directors given our criteria of **productivity**, **quality** and **profitability**. The question of '**who the best director is**' depends on our criteria.

MOVIE MARKETS: WHO SHOULD WE TARGET?

HIGHEST GROSSING MOVIE MARKETS

MOST PROFITABLE MOVIE MARKETS

- The top 3 movie markets are found in the US, Spain and Argentina with India and the United Kingdom making up the tail end of this list
- Worldwide Gross Movie Revenues in the US (**USD 12B**) are nearly **2x*** as much as the next two countries (approx. **USD 7B**)

✓ **Insight:** The **United States** is clearly the biggest movie market globally (being the home of Hollywood). Any films that can break into this market are bound to succeed. We should also watch out for key **European** (Spain, France) and **Latin American** (Argentina) Markets.

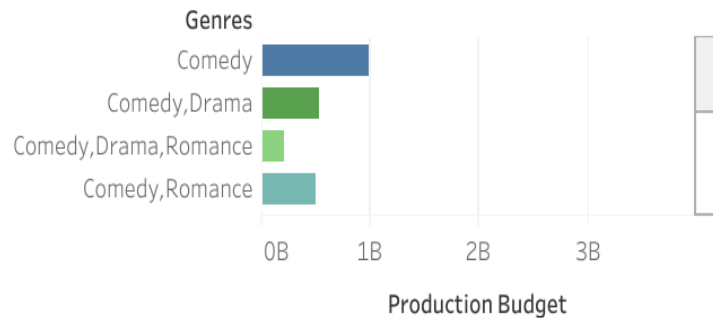

* 1.77x to be exact

A VIEW FROM THE DASHBOARD

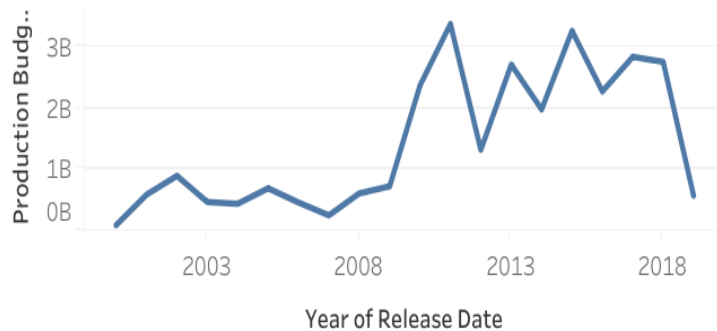

- ❖ This interactive dashboard provides different insights based on the dataset.
- ❖ Some of these insights include:
 - ❖ Yearly Trends of Movie Revenues
 - ❖ Profitability by Movie Genre
 - ❖ Total revenue by market.
- ❖ Business stakeholders can use these insights to plan on investments.
- ❖ The Tableau Dashboard can be found through this link:
[Movie Market Analytics Dashboard \(Tableau Public\)](#)

CONCLUSION

- ✓ Drama films are the most popular genre
- ✓ Action-Adventure and Comedy films are the most profitable genre
- ✓ The best movie directors operate in **niches** - **experience, quality** or **profitability**.
- ✓ Choosing the 'right' director depends on what we prioritize
- ✓ The most robust movie markets are in the US, Spain and Argentina

RECOMMENDATIONS

- ❑ Invest in **High-Yield Genres**:

- ❑ Prioritize Action, Adventure and Comedy films for greater revenues

- ❑ Collaborate with **Top Talent**:

- ❑ Partner with proven directors who have experience making movies that sell (prioritize profitability).

- ❑ Expand into **Profitable Markets**:

- ❑ Create films which cater to audiences in the US, Europe (Spain, France) and Latin America (Argentina)

That's all Folks!
