

Quantitative Insights into Film Success: Evaluating Ratings, Genres, and Global Market Impact

- Data-driven recommendations based on industry analysis
- Presented by: Group Five
- Date: 30/04/2025

Project Objective

- To identify the most popular movies, actors and directors over the past years based on movie ratings.
- To determine which movie genres, yield the highest profitability as well as identify the most successful movie directors based on gross movie revenues.
- To identify the most profitable movie market(domestic or foreign) as well as the top movie genres and directors in each market based on movie ratings and revenues.
- Translate findings into actionable insights.

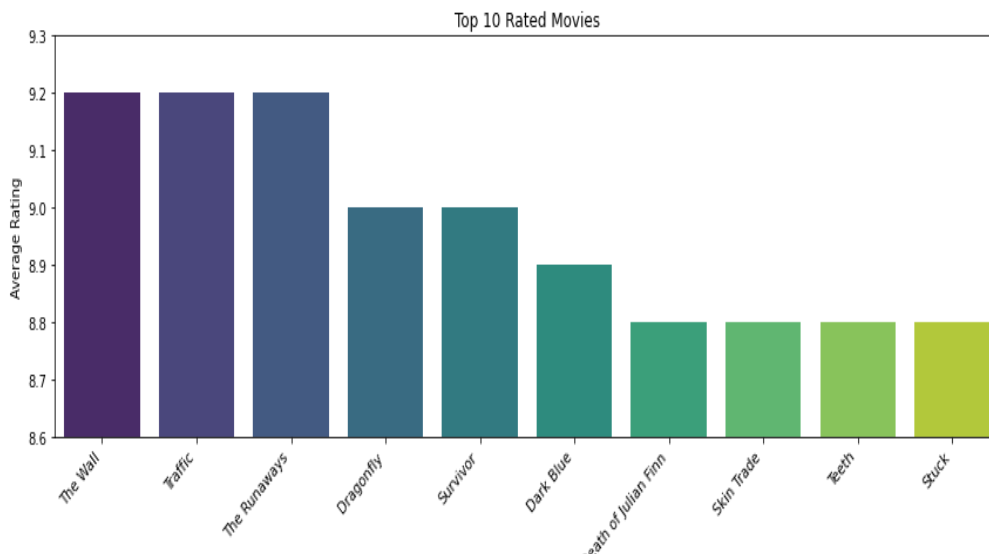

Data Sources

- - Box Office Mojo
- - IMDb
- - Rotten Tomatoes
- - The Movie Database (TMDb)
- - The Numbers

Data Analysis

❖ Top 10 Rated movies

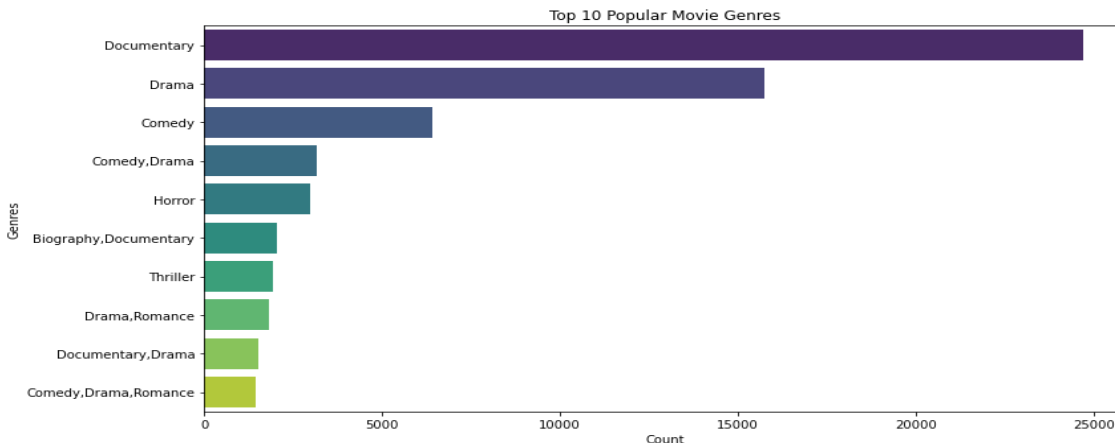

- A bar chart analyzing the top ten rated movies.
- The ratings are tightly clustered, indicating a high bar for top-tier movies
- Insight: Consistent genres (Drama, Thriller), common directors, and repeat cast members signal a quality formula

Data Analysis (cont'd)

❖ Top ten popular movie genres

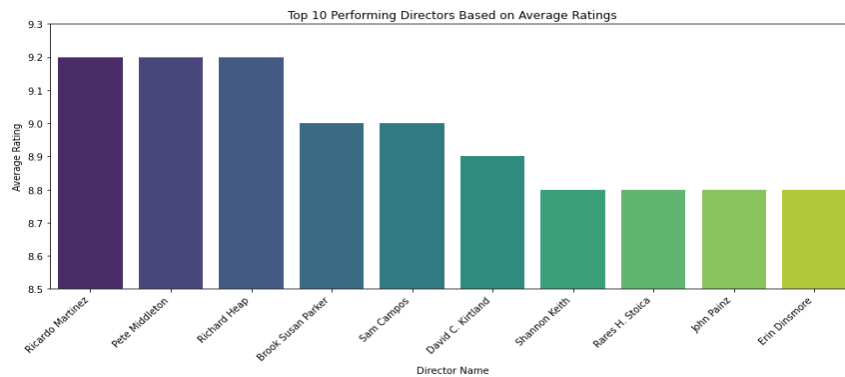

- A Horizontal Bar Chart showing top ten movie genres based on ratings.
- Documentary is by far the most common genre.
- Insight: Action, Adventure, and Animation are both frequent and high-earning genres

Data Analysis (cont'd)

❖ Top ten performing directors

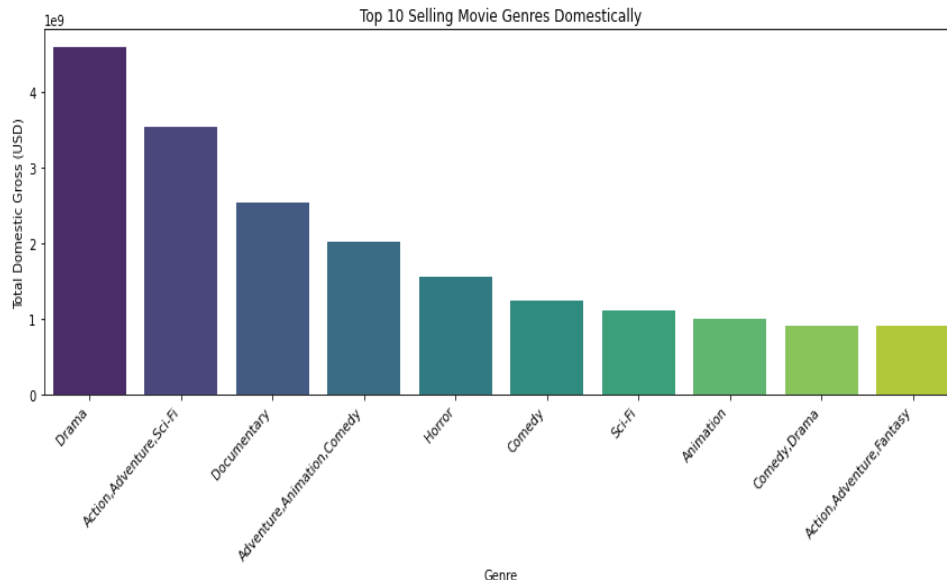

- This is a vertical bar chart, showing Top 10 Performing Directors Based on Average Ratings.
- Insight: Rodrigo García, Paul McGuigan, and Alexander Payne all share the highest average rating showing consistently exceptional performance.

Data Analysis (cont'd)

❖ Top 10 selling movie genres domestically

- Insight: While foreign markets dominate overall profitability, the domestic market reveals valuable trends. Genres like Comedy, Drama, and Thriller tend to generate stronger returns locally, likely due to cultural familiarity and relatable storytelling.

Yearly Trend of Movie Revenues

Conclusion

- Top-rated movies often feature strong directors, actors, and production values.
- Certain directors and actors consistently appear in high-grossing films.
- Adventure, Action, and Sci-Fi genres generate the most revenue.
- Foreign markets outperform domestic in gross revenue.
- Star power and directorial expertise greatly influence profitability.

Recommendations

- 1. Invest in High-Yield Genres:
 - - Prioritize Action, Adventure, and Sci-Fi for high ratings.
- 2. Collaborate with Top Talent:
 - - Partner with proven directors and actors.
- 3. Expand into Foreign Markets:
 - - Focus on global appeal and distribution.
